

# Country

Method	URL	Example
GET	/api/v1/countries/<countryId>	<a href="https://api.spreadshirt.net/api/v1/countries/1?mediaType=json">https://api.spreadshirt.net/api/v1/countries/1?mediaType=json</a>

Allows to look up localization data of the country your shop is based in. Most notably, fields "decimalPoint", "thousandsSeparator" and "currencyPattern" can be used to format prices in a localized way (as described in the tutorial).

## Example Payload

```
{
  "href" : "https://api.spreadshirt.net/api/v1/countries/1",
  "id" : "1",
  "name" : "Germany",
  "isoCode" : "DE",
  "thousandsSeparator" : ".",
  "decimalPoint" : ",",
  "length" :
  {
    "unit" : "cm",
    "unitFactor" : 1
  },
  "currency" :
  {
    "href" : "https://api.spreadshirt.net/api/v1/currencies/1",
    "id" : "1"
  },
  "currencyPattern" : "% $",
  "defaultLanguage" :
  {
    "href" : "https://api.spreadshirt.net/api/v1/languages/1",
    "id" : "1"
  },
  "defaultVatRate" : 19
}
```
